DETAILED ACTION

Claim Objections

1. Claim 7 is objected to because of the following informalities: the word "component" is misspelled. Appropriate correction is required.

Claim Rejections - 35 USC § 102

.2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Popp et al. US Patent Application Publication 2002/0123730.

As to claims 1, 11, 12, 13, and 18, Popp discloses a packaged garment defining a waist opening 50 and a leg opening 52, the garment comprising, a front region 22 comprising a front panel 35 and defining a front waist edge 38, a back region 24 comprising a back panel 135 and defining a back waist edge 39, and a crotch region 26 connecting the front and back regions; first and second front side panels 34 extending transversely from respective sides of the front panel, each front side panel having a body facing surface 42 and a clothing facing surface 40; first and second back side panels 134 extending transversely from respective sides of the back panel, each back side panel having a body facing surface 42 and a clothing facing surface 40; wherein the first front side panel is connected to the first back side panel to form a first prefastened,

Art Unit: 3761

refastenable seam 80, the first refastenable seam comprising a first fastening component 82; the second front side panel is connected to the second back side panel to form a second prefastened, refastenable seam 80, the second refastenable seam comprising a second fastening component 82; wherein the first and second fastening components lie in first and second planes, the first and second planes being approximately perpendicular to a plane in which the front panel lies.

As to claims 2 and 16, Popp discloses the first and second refastenable seams 80 are formed between a body-facing surface 42 of the front side panel and a clothing-facing surface 40 (paragraph 0080) of the back side panel (paragraph 0091).

As to claims 3 and 15, Popp discloses the first and second front side panels are folded over a distal edge of the back side panel (Figure 6, paragraphs 0106-0109).

As to claim 4, Popp discloses the fastening component is permanently bonded to the back side panel (0091).

As to claims 5 and 14, Popp discloses the first and second refastenable seams are formed between a clothing-facing surface of the front side panel and a body-facing surface of the back side panel (0091).

As to claims 6 and 17, Popp discloses the first and second back aback side panel is

Application/Control Number: 10/632,596

Art Unit: 3761

folded over a distal edge of the front side panel (Figure 6, paragraphs 0106-0109).

As to claim 7, Popp discloses the fastening component is permanently bonded to the front side panel (paragraph 0091).

As to claim 8, Popp discloses the fastening component is engaged with a mating fastening component, wherein the mating fastening component is integral with a side panel (paragraphs 0092, 0093).

As to claims 9 and 10, see Figures 1-3.

As to claims 12 and 13 see Figures 1-3, paragraph 0110.

As to claim 19-22, Popp discloses a package of prefastened, refastenable garments; see the discussion of claim 1, supra. Popp further incorporates by reference (paragraph 0013) Kuske WO 97/49618, which teaches a generally polyhedral enclosure composed of a flexible material surrounding a plurality of prefastened, refastenable garments including an end garment as claimed, the polyhedral enclosure comprising a pair of side walls, a pair of end walls, a top wall, and a bottom wall (Figures 3-12).

Any inquiry concerning this communication or earlier communications from the
